

Control Panel Quick Reference

SureStore E SCSI Bridge FC 4/2

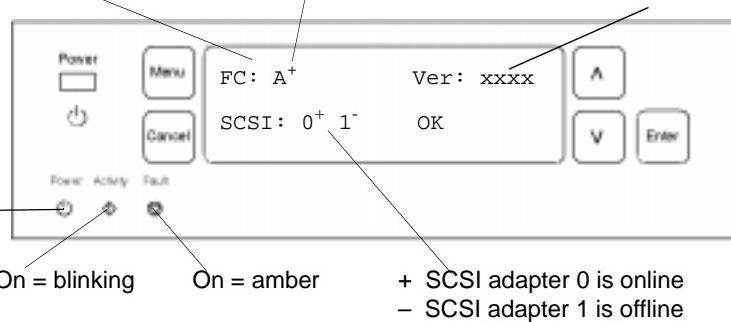

Slot Status Screen Example

Slot locations of FC A and B, and SCSI 0,1, 2 and 3. Only the adapters detected by the SSB are displayed.

- + FC is online
- FC is offline
- ? FC is trying to communicate with the host

SSB revision number

On = green

See Table 5 (page 67) of the SSB Service and User Manual for a description of the Activity and Fault LEDs.

How to Use the Control Panel

Use the control panel buttons to navigate through the Main Menu and control SSB functions. The other side of this card shows the menu hierarchy.

Power

Power-cycles the SSB and initiates SSB self test.

Displays the Main Menu.

Scrolls up or down.

Selects a menu or option, or performs a task.

Cancels a selection and returns to the previous screen.

Chapter 4 of the *SureStore E SCSI Bridge FC 4/2 Service and User Manual* explains the functions of the control panel.
